PROJECTS

Serverless Speech-to-Text with AWS Transcribe and S3 Event Trigger using Lambda and CloudWatch

⌗ link

This experiment demonstrates how to use AWS services to convert speech from an audio file to text using AWS Transcribe and S3 Event Trigger with Lambda and CloudWatch.

⌗ **Corporate Recruitment System using Spring Boot**

Corporate Recruitment Management system is helpful for the job providersi.e. companies which are in need of employees, job seekers who are in need of job, (for both Exp and freshers). This portals main aim is to provide the vacancies available for the job seekers without taking any charge from them in IT technologies and finally I deployed the entire project in AWS cloud.

HOBBIES

Playing cricket, Reading books, Watching TV
